how poignant it is to look at some of Gould's beautiful images of our animals and know that some are no longer with us and some are fighting for their lives in this book author Fred Ford compares Gould's world and the world that the animals live in at that time with the world today John Gould's *Extinct and Endangered Mammals of Australia* includes 46 Australian mammal species that today are threatened or extinct and that were portrayed in the lavish colour plates in John Gould's 1863 publication *The Mammals of Australia* each animal opener spread begins with a Gould plate accompanied by at a glance a very short summary the conservation status according to the EPBC Environment Protection and Biodiversity Conservation list the species names a map of its former and current distribution and sites of reintroduction and a timeline of the species history since European colonisation accompanying the pictures are accounts of the animals as they lived in the relatively untouched Australia that John Gould knew and evidence of the attitudes of European settlers towards the native fauna the author provides the reader with fascinating and often poignant material and stories of what would be considered today as shameful behaviour and attitudes towards Australia's native fauna in this book are not only sobering stories of the fate of these animals after Gould's time but also success stories of reintroducing species to places ridding areas of introduced pests and preserving habitat

Australian climate policy and diplomacy provides a well overdue critique of existing and high profile publications that convey the greenhouse mafia hypothesis which posits that Australia's weak policy response to climate change is the result of a menacing domestic fossil fuel lobby Ben Parr argues that the shared government industry discourse about protecting Australia's industrial competitiveness has had a more decisive influence in shaping and legitimising Australian climate policy than the direct lobbying tactics of the fossil fuel industry Parr also reveals how the divergent foreign policy discourses and traditions of Australia's two major political parties as internationalist versus alliance focused have enabled and constrained their climate diplomacy and domestic policies over time to demonstrate his argument he presents a discourse analysis woven into a chronological policy narrative comprising more than 1000 primary texts media releases interviews and speeches generated by prime ministers and key fossil fuel lobbyists overall this volume illustrates how domestic forces have and are influencing Australia's climate policy in doing so it also provides a framework that can be adapted to examine climate mitigation policies in other countries notably Canada and the US this book will be of interest to students and scholars of climate change environmental policy and governance and Australian climate change policy and politics more specifically as well as policymakers and practitioners working in these fields

australia has always been reliant on great and powerful friends for its sense of national security and for direction on its foreign policy first on the british empire and now on the united states australia has actively pursued a policy of strategic dependence believing that making a grand bargain with a powerful ally was the best policy to ensure its security and prosperity dangerous allies examines australia's history of strategic dependence and questions the continuation of this position it argues that international circumstances in the world and in the western pacific especially now make such a policy highly questionable since the fall of the soviet union the united states has also changed dramatically making it less relevant to australia and a less appropriate ally on which australia should rely malcolm fraser argues that australia should adopt a much greater degree of independence in foreign policy and that we should no longer merely follow other nations into wars of no direct interest to australia or australia's security he argues for an end to strategic dependence and for the timely establishment of a truly independent australia
