as the business environment has become more and more turbulent over the past decade information technology has begun to run into the danger of becoming an impediment rather than a motor of progress in order to deal with the need for rapid continuous change computer science is challenged to develop novel interrelated information and communication technologies and to align them with the social needs of co operating user groups as well as the management requirements of formal organisations workflow systems are among the most advertised technologies addressing this trend but they mean different things to different people computer scientists understand workflows as a way to extract control from application programs thus making them more flexible bureaucratic organisations and most commercial products perceive them as supporting a linear or branching flow of documents from one workplace to another the next try after the failure of office automation this book takes another perspective that of the modern customer driven and groupwork oriented process organisation extending the language action perspective from the cscw field its customer oriented view of workflows enables novel kinds of business process analysis and leads to interesting new combinations of information and co operation technologies schal s empirical studies show some of the pitfalls resulting from a naive use of these technologies and exemplify ways to get around these pitfalls

this book introduces the perspective of customer driven and teamwork oriented process organisation its aim is to design and test concepts of computer supported cooperative work especially concepts for workflow management systems in order to

fundamentally improve business processes in enterprises its methodological approach to analysis and design of cooperative networks is a response to shortcomings of current support systems and misunderstandings about cooperative work and team based organisations several different commercial workflow management systems are presented and distinguished in terms of their main characteristics novel kinds of business process analysis are proposed leading to interesting new combinations of information and cooperation technologies the book not only presents ways to get around the pitfalls resulting from a naive use of these technologies but also identifies design guidelines and critical success factors publisher s website
