something good about the smart city
a human centered account of why the future of electricity is local
resilience now matters most and most resilience is local
even for that most universal foundational modern resource the electric power grid
today that technological marvel is changing more rapidly than it has for a lifetime
and in our new grid awareness community microgrids have become a fascinating catalyst for cultural value change in downtime on the microgrid

malcolm mccullough offers a thoughtful counterpoint to the cascade of white papers on smart clean infrastructure writing from an experiential perspective mccullough avoids the usual smart city futurism technological solutionism policy acronyms green idealism critical theory jargon and doomsday prepping to provide new cultural context for a subject long a favorite theme in science and technology studies mccullough describes the three eras of north american electrification innovation consolidation and decentralization he considers the microgrid boom and its relevance to the built environment as architecture s grid edge finally he argues that resilience arises from clusters although a microgrid is often described as an island future resilience will require archipelagos clusters of microgrids with a two way intermittent connectiveness that is very different from the always on top down technofuture we may be expecting with downtime on the microgrid mccullough rises above techno hype to find something good about the smart city and reassuring about local resilience
