the year of 1832 marked a turning point in france as the country struggled to find its way in the wake of the french revolution following the revolution of 1830 legitimists supporters of the recently ousted bourbon dynasty s claim to the

throne continued to plot against king louis philippe and his july monarchy in early 1832 after failing to launch a coup in southern france legitimists plotted an unsuccessful uprising in the vendée a region in western france that had supported the royalist cause during the french revolution the duchesse de berry led the rebellion in the hopes of placing her son the bourbon heir on the french throne the revolt marked the last attempt by the bourbons to retake the throne by force and helped solidify the end of the bourbon dynasty during the cholera outbreak which also spread throughout france in 1832 lower income areas suffered higher losses to the disease for they were more likely to have contaminated water supplies the lower classes spread rumors that the outbreak was an elitist plot to subdue the masses and the epidemic exacerbated class tensions meanwhile conditions in france continued to be characterized by violence during the early 1830s as louis philippe attempted to establish his regime s authority the most significant of these uprisings was the republican dominated june revolution of 1832 victor hugo and other contemporaries perceived the barricades of june as natural extensions of the cholera epidemic or the political continuation of a biological crisis the sad fate of the uprising however prompted republicans to regroup and develop new strategies for success as a whole then 1832 helped solidify the end of the bourbon monarchy and class identities and was a crucial moment in the re organization and growing solidification of french republicanism that paved the way for the revolution of 1848 this edited collection examines these three pivotal events in french history in 1832 a royal legitimist uprising led by the duchesse de berry the cholera epidemic and the june revolution featured in the climax of hugo s novel *les misérables* within the context of the legacy of the french revolution while the events of 1832 are significant they have been relatively ignored because scholars have been distracted by the revolutions of 1830 and 1848 this collection is the first piece of scholarship to examine these three events in an interconnected pattern to better examine france as it transitioned from a monarchy to a republic as a result this collection will be of value to both historians and academics studying diverse subfields within french and european studies

twenty first century issues perspectives of pandemic climate change and digital transformation is a stimulating compilation of work that addresses the twentieth century s dichotomy and relationship to the twenty first century as a result of global challenges impacting health economics and digital transformation the focal point of this research is aggressively making researchers level up scientific advancements to harness needed resources twenty first century science and technology research is vital to meeting a broad range of global challenges related to economic growth better health sustainable development and enhanced safety and security this compilation of work gives readers insight about preparation for world improvements and how to meet the futuristic needs

of civilization

the aim of this book is to synthesize the role of information throughout the history of civilization s development this will be defined through the convergence of a the cumulative evolution and revolution of the intellect cognition as data information concepts knowledge and wisdom b labor and c politics which seek to control the environment society and the world applying culture and infrastructure as tools whereas researchers reveal the myriad of dimensions of the social order and its historiography this book provides a synthesis of the relations which is limited to information and its informing systems and civilization within the context of historiosophie history with judgment the method presented in this book the architectural approach to the dynamics of civilizational development is a new layer over the quantitative history based on statistical data in an architectural synthesis of civilization we seek a big picture of civilization waves in order to develop some criteria oriented views of the world and its future predictability to understand the crises and conflicts of civilization which are driven by technology in recent centuries such a synthesis as well as optimism for human proactive adaptation survival and development must be undertaken this approach to civilizational development should allow humans to eventually reinvent the future in a continuous manner we in due course should be able to predict the rate of change and provide civilization bridging solutions based on original thinking it is important to remind ourselves that information is as old as our world about 15 billion years because plants and trees and in general non human nature produces all sorts of information for example the changing colors of plants and trees which is associated with the different seasons when the first living organisms appeared on our planet they had ability to inform as well by changing forms colors signals and so one the first signs of life on our planet came into being about 3 85 billion years ago therefore organism based life on the earth actually came to be over a period of just 130 million years hominids diverged from apes some 10 6 million years ago instinct driven info communication i e behavior less controlled by cognition and the first humans bipeds with large brains who could use tools and sound driven info communication took form around 6 2 5 million years ago in southeast africa homo symbolicus who could skillfully use language appeared about 60 000 years ago the origin of civilization some 6 000 years ago marks the beginning of the first advanced info communication systems applied by humans who could even record information
