jensen explores the long standing conflict over the sovereignty of western sahara from its colonial roots to its present manifestation as a political stalemate

the author of this book served in a number of peacekeeping operations in western sahara darfur and afghanistan therefore has gathered invaluable practical experience about such missions as a military staff part of minurso in 2003 2004 jános besenyő started to narrowly deal with the history of western sahara the traditions and daily practices of the inhabitants of the area the activities of the peacekeeping force of the world organisation in particular with the root causes of the saharan conflict and their possible solution in this book jános besenyő introduces the readers the causes and escalation of the conflict in western sahara the actors and the opposing parties together with their motivations thus he fills in a gap connected with less known part and problem of our ever globalising world

this book explores the traces of the passage of time on the protracted and intractable conflict of western sahara the authors offer a multilevel analysis of recent developments from the global to the local scenes including the collapse of the architecture of the un led conflict resolution process the advent of the war on terror to the the sahara sahel area and the impact of the arab spring and growing regional security instability special attention is devoted to changes in the western sahara territory annexed by morocco and the sahrawi refugee camps in algeria morocco has adapted its governance and public policies to profound socio demographic transformations in the territory under its control and has attempted to obtain international recognition for this annexation by proposing an autonomy plan the polisario front and sahrawi nationalists have shifted their strategy and pushed the centre of gravity of the conflict back inwards by focusing on pro independence activism inside the disputed territory

investigates the decision making process rationale and determining factors which underlie strategic shifts from armed to nonviolent strategies of resistance draws on a wide range of case studies from western sahara egypt palestine nepal west papua south africa mexico chiapas and colombia will be of much interest to students of non violence peace and conflict studies political sociology security studies and in general

this book provides a unique comparative study of the major secessionist and self determination movements in post colonial africa examining theory international law charters of the united nations and the organisation of african unity oau african union s au stance on the issue the book explores whether self determination and secessionism lead to peace stability development and democratisation in conflict ridden societies particularly looking at the outcomes in eritrea and south sudan the book covers all the major attempts at self determination and secession on the continent extensively analysing the geo political economic security and ideological factors that determine the outcome of the quest for self determination and secession it reveals the lack of inherent clarity in international law social science theories oau au charter un charters and international conventions concerning the topic this is a major contribution to the field and highly relevant for researchers and postgraduate students in african studies development studies african politics and history and anthropology

friends indeed adds to the literature on international conflict resolution and the role played by groups of states created to support un peacemaking and peace operations this book furthers our understanding of how and in what circumstances the united nations secretary general and secretariat can work productively with these group of friends in the resolution of conflict

anatomy of the dicotyledons ii wood structure and conclusion of the general introduction

this volume is a sequel to the two introductory volumes 1980 1983 to the second edition of anatomy of the dicotyledons of which the first edition appeared in 1950 it is the first in a series in which the comparative structure of the leaf stem and wood is to be described as a contribution to the classification of the families of dicotyledons the ecological significance of some of the characters is also discussed the present volume covers twenty families that are generally accepted as fairly close relatives and are of special interest because of their alleged primitive status in the hierarchy of plant families much information has become available about these families since the first edition was published either in scattered publications or through original observations at kew the text relating to these families has accordingly been

completely rewritten and expanded the volume contains a wealth of newly prepared photographs and a comprehensive bibliography

a general reference for topics related to health worldwide this encyclopedia is ambitious in its scope with entries for specific diseases and conditions geographical areas health issues biographical information and organizations related to world health policy choice a useful one stop reference for health professionals and the general population alike that speaks to important changes and issues in global health a foundation of knowledge essential for any library library journal the contemporary understanding of global health is complicated and extends to all ends of the earth and beyond from the health effects of global warming to the implications of single nucleotide differences on disease the factors that impact global health are extremely diverse and are changing constantly as new scientific advances are made as new policies are implemented as wars are waged and peace agreements signed or as new strains of infectious diseases evolve the state of global health changes the encyclopedia of global health is a comprehensive one stop reference to a broad array of health topics worldwide encompassing four volumes with more than 1 200 articles the encyclopedia covers all aspects of health including physical and mental health entries biographies of major doctors and researchers profiles of medical institutions organizations and corporations descriptions of drugs and operations articles on national health policies and thematic health topics in the humanities key features offers a truly global approach by giving the current health status in each country of five continents compares the mortality rates of infectious diseases and non communicable diseases in developing and developed countries presents a historical context for important changes and issues in global health and serves as a foundation of knowledge examines how mental health and related conditions in developing countries are increasing toward the level in developed countries ties the curriculum in related health disciplines from biology to psychology to psychopharmacology provides a glossary of health definitions extensive cross references to related topics and thorough bibliographic citations key themes children s health countries africa countries americas countries asia countries europe countries pacific diseases cancers diseases localized diseases systemic drugs and drug companies health sciences men s health mental health organizations and

associations people procedures and therapies research society and health women s health the encyclopedia of global health is a useful reference for health professionals as well as for general populations making it a must have resource for any library
