seminar paper from the year 2015 in the subject sociology economy and industry grade 10 university of  
trier chair of environmental and urban economics course european environmental economics language  
english abstract this paper will focus on the e mobility and the evolution of electric vehicles and discuss  
environmental issues that are closely connected to the green movement first a brief overview of the  
environmental aspects related to the topic mentioned will be given there will be a discussion not only  
on those aspects on a national level but also on a european and global level furthermore this text will  
deal with the technology of the e mobility and focus on exploring which economic environmental and  
political aspects are connected with e mobility and environmental concerns in germany additionally an  
international comparison between germany and france and germany and the usa will be made to enable  
the reader to know where these countries stand concerning sales of electric vehicles political action and  
infrastructure of e mobility over the past 40 years one can observe an evolution of environmental  
concern in several areas this transition is called an evolution from environmentalism to green there is a  
shift from emphasizing environmental problems to the underlying problems with our social economic  
technical or legal system further the geographical focus changes from local problems to global issues  
there has been a gradual change in the attitude towards business from the business as the core of the  
problem to the business as a part of the solution to problems can be observed as well from a marketing  
point of view one can observe the emerging importance of green awareness in the media during the late  
80s it is argued that a change in consumption behaviour of consumers led to the reaction of the  
producers moreover since the early 1990s more than 85 of the multinational companies in europe have  
adapted themselves to this green movement by changing their way of production in this connection not  
just specific sectors in the european economy have been affected by this adjustment process but almost  
every line of businesses technological change is denoted as a possible solution to some negative  
environmental effects in the same context it is added that new technologies also may introduce new  
environmental issues such that the strategic management towards sustainability became increasingly  
important
