Can we construct a grand strategy to counter terrorism fifteen years after September 11? The United States still faces terror threats both domestic and foreign. After years of wars, ever more intensive and pervasive surveillance, enhanced security measures at major transportation centers, and many attempts to explain who we are fighting and why, and how to fight them, the threats continue to multiply. So too do our attempts to understand just what terrorism is and how to counter it. Two leaders in the field of terrorism studies, Martha Crenshaw and Gary LaFree, provide a critical look at how we have dealt with the terror threat over the years. They make clear why it is so difficult to create policy to counter terrorism: the foes are multiple and often amorphous; the study of the field dogged by disagreement on basic definitional and methodological issues; and the creation of policy hobbled by an exacting standard: the counterterrorist must succeed all the time, the terrorist only once. As countering terrorism shows, there are no simple solutions to this threat.

This volume addresses the issues of remembering and performing the past in Eastern European ex-communist states in the context of multiplication of the voices of the past. The book analyzes the various ways in which memory and remembrance operate. It does so by using different methods of recollecting the past: from oral history to cultural and historical institutions, and by drawing on various political and cultural theories and concepts. Through well-documented case studies, the volume showcases the plurality of approaches available for analyzing the relationship between memory and narrative from an interdisciplinary and international perspective.

significant emotions is a piercing examination of the rising use of emotional signifiers in public debate and the rhetoric of an increasingly expansive array of social problems building on ideas developed in ashley frawley s previous book semiotics of happiness it examines in detail the emotional turn across the social sciences and the broader cultural rise of the age of emotion and its influence on how we talk about and approach new social issues the book explores the rise of supposedly positive emotional signifiers that have gained prominence as powerful causes of and solutions to nearly every social ill from promoting self esteem happiness and mindfulness to concerns for well being and mental health conceptualizing the rise and comparative decline of these emotional signifiers as cycles of discovery adoption expansion and exhaustion the book argues that rather than calling into question one or another of these signifiers it is necessary to penetrate deeper to the underlying cultural currents that drive their adoption and contribute to their rhetorical power through a systematic and in depth exploration of the appearance of these trends in a variety of claims making activities across academia traditional and social media and social policy frawley argues that the age of emotion does not represent a step toward a more enlightened and emotionally aware society rather it signifies a preoccupation with emotional deficits and a firm belief that emotional disorientation ultimately underlies nearly every social ill emerging from the analysis is the conclusion that emotions have become key signifiers of broader cultural tendencies to affirm conservatism over progress vulnerability over resilience and the determined self over the free willing subject
