this volume contains an excellent set of papers by top scholars in environmental and resource  
economics these papers span the wide range of topics that characterized the extraordinarily broad  
and productive career of gardner brown they bring current issues in modeling important  
environmental policy questions into sharp focus in a way that emphasizes brown s seminal insights  
richard carson university of california san diego us i am glad this book has been written gardner is  
clearly too radical to get a statue and i doubt he would have the patience to sit long enough for the  
sculptor to finish yet gardner s ideas really deserve remembrance the editors have managed not  
only to cover many of the areas and methods gardner worked with but also to find authors who  
loved and or respected him and who have honoured him by providing high quality work in his spirit  
the book is imbued with those curious blends of curiosity and rigour daring abstraction and yet  
painstaking attention to detail that are so characteristic of gardner s work it was a great pleasure to  
read thomas sterner university of gothenburg sweden gardner m brown jr has been a leading  
innovator in the development of environmental and natural resource economics this book  
comprises essays written in his honor by some of the most distinguished economists working in  
this field the principal themes addressed include fundamental theoretical and empirical issues in  
the valuation of environmental and natural resources the relationships between economic growth  
natural resources and environmental quality re evaluation of some standard results in the dynamic  
modeling of renewable and non renewable resources the protection and management of biological  
resources and the economics of antibiotic resistance the original papers within this book will be of  
great interest to academics and practitioners in the field of environmental and natural resource  
economics
