this book challenges the validity of adhd learning disabilities and dyslexia as meaningful special education categories and critically examines the misplaced medical model from which they are derived the presumption that these disabilities cause school related problems detracts from identifying factors within the classroom that create and maintain a child s underachievement and disruptive behavior moreover when the disability is finally named it provides no functional information that translates into effective coping strategies macht delves into the misunderstood structure of these disabilities pointing out that they are not verifiable disabilities but weak constructs that poorly describe each child s uniqueness finally he provides an alternative model based on children s strengths rather than their deficiencies and presents strategies that advance school related success
