in this book the 2000 year history of christian worship is viewed from a sociological perspective martin stringer develops  
the idea of discourse as a way of understanding the place of christian worship within its many and diverse social  
contexts beginning with the biblical material the author provides a broad survey of changes over 2000 years of the  
christian church together with a series of case studies that highlight particular elements of the worship or specific  
theoretical applications stringer does not simply examine the mainstream traditions of christian worship in europe and  
byzantium but also gives space to lesser known traditions in armenia india ethiopia and elsewhere offering a  
contribution to the ongoing debate that breaks away from a purely textual or theological study of christian worship this

book provides a greater understanding of the place of worship in its social and cultural context

this book is a critique of cambridge school historical contextualism as the currently dominant mode of history of political thought drawing upon michael oakeshott s analysis of the logic of historical enquiry while acknowledging that the early cambridge school work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute the first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds the second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy in addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy since rethinking history of political thought in oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents an important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies

combining a detailed focus on the core skills and principles underpinning good history teaching this book will help develop a strong understanding of key historical concepts and the dynamics of the primary history national curriculum

information technology offers powerful tools to facilitate and to assist learning across the whole curriculum the computer is certainly the most significant development in educational technology in the twentieth century history may be thought of as a staid and perhaps tradition bound subject more resistant to change than some areas yet in history

too information technology is making an impact this volume shows how information technology is currently contributing to and bringing about changes in the way history is taught and learned the international selection of the contributions shows that these phenomena are not restricted to just one country the impact of information technology on history curricula is explored in depth in one section of the book whilst other sections focus on classroom activities and issues on the development of software for history and on the relevance of current information technology developments but the question which lies at the heart of it all remains that of how information technology can enhance the teacher s ability to offer situations in which learners can form and develop a real understanding of the nature of historical processes and the ways in which they can be studied

proper management of water resources can take many forms and requires the knowledge and expertise to work at the intersection of mathematics geology biology geography meteorology political science and even psychology this book provides an essential foundation in water management and development concepts and practices dissecting complex topics into short understandable explanations that spark true interest in the field approaching the study of water resources systematically the discussion begins with historical perspective before moving on to physical processes engineering water chemistry government regulation environmental issues global conflict and more now in its fourth edition this text provides the most current introduction to a field that is becoming ever more critical as climate change begins to threaten water supplies around the world as geography climate population growth and technology collide effective resource management must include a comprehensive understanding of how these forces intermingle and come to life in the water so critical to us all

the long short term memory network or lstm for short is a type of recurrent neural network that achieves state of the art

results on challenging prediction problems in this laser focused ebook finally cut through the math research papers and patchwork descriptions about lstms using clear explanations standard python libraries and step by step tutorial lessons you will discover what lstms are and how to develop a suite of lstm models to get the most out of the method on your sequence prediction problems
