patterns of world history offers a distinct framework for understanding the global past through the study of origins interactions and adaptations authors peter von siviers charles a desnoyers and george stow each specialists in their respective fields examine the full range of human ingenuity over time and space in a comprehensive even handed and critical fashion the book helps students to see and understand patterns through origins interactions

adaptations these key features show the o i a framework in action seeing patterns a list of key questions at the beginning of each chapter focuses students on the 3 5 over arching patterns which are revisited considered and synthesized at the end of the chapter in thinking through patterns each chapter includes a patterns up close case study that brings into sharp relief the o i a pattern using a specific idea or thing that has developed in human history and helped in turn develop human history like the innovation of the chinese writing system or religious syncretism in india each case study clearly shows how an innovation originated either in one geographical center or independently in several different centers it demonstrates how as people in the centers interacted with their neighbors the neighbors adapted to and in many cases were transformed by the idea object or event adaptations include the entire spectrum of human responses ranging from outright rejection to creative borrowing and at times forced acceptance concept maps at the end of each chapter use compelling graphical representations of ideas and information to help students remember and relate the big patterns of the chapter

a textbook history of the world focusing on the development of various civilizations

industrialization is still the factor that distinguishes the modern world from the past and advanced countries from undeveloped ones in this revised and expanded edition tom kemp uses the historical record of industrialization to explore key questions about its impact and the significance we assign to it the book adopts a thematic approach to examine the roles of technology banking transport and the state the fate of the peasantry in an industrializing society and the changing features of industrial capitalism in the latter part of the 19th century it features four contrasted case studies from outside europe india canada japan and for the first time in this second edition south africa it is aimed at 1st year university polytechnic students and is suitable for courses in economic history social history development studies applied economics international economics and area studies

patterns of world history with sources fifth edition offers a distinct framework for understanding the global past through the study of origins interactions and adaptations the authors examine the full range of human ingenuity over time and space in a comprehensive evenhanded and critical fashion they offer a distinct intellectual framework for the role of innovation and historical change through patterns of origins interactions and adaptations each chapter ends with four to six primary sources both textual and visual

patterns of world history comes to the teaching of world history from the perspective of innovations the engine of historical change innovation is nothing new so what we advocate in this book is a distinct intellectual framework for understanding innovation through its patterns of origin interaction and adaptation each small or large technical or cultural innovation originated in one geographical center or independently in several different centers as people in the centers interacted with their neighbors the neighbors adapted to and in many cases were transformed by the innovations by adaptation we include the entire spectrum of human responses ranging from outright rejection to creative borrowing and at times forced acceptance what do we gain by studying world

history as patterns of innovation first if we consider innovation to be a driving force of history it helps satisfy an intrinsic human curiosity about origins our own and others perhaps more importantly seeing patterns of innovation in historical development brings to light connections and linkages among peoples cultures and regions that might not otherwise present themselves at the same time such patterns can also reveal differences among cultures that other approaches to world history tend to neglect for example the differences between the civilizations of the eastern and western hemispheres are generally highlighted in world history texts but the broad commonalities of human groups creating agriculturally based cities and states in widely separated areas also show deep parallels in their patterns of origins interactions and adaptations such comparisons are at the center of our approach second this kind of analysis offers insights into how an individual innovation was subsequently developed and diffused across space and time that is the patterns by which the new eventually becomes a necessity in our daily lives through all of this we gain a deeper appreciation of the unfolding of global history from its origins in small communities to the densely populated large countries in our present world finally our use of a broad based understanding of innovation allows us to restore culture in all its individual and institutionalized aspects spiritual artistic intellectual scientific to its rightful place alongside technology environment politics and socio economic conditions that is understanding innovation in this way allows this text to help illuminate the full range of human ingenuity over time and space in a comprehensive evenhanded and open ended fashion
