renowned for its precise in depth coverage of international trade and finance this  
classic text features a balance of the latest research critical policy issues and  
sophisticated economic analysis

the study derives the parameters needed to estimate the effect of an  
autonomous change in one country's imports on world trade from the experience  
of the 1952-1963 period one obtains for each of the 12 major industrial nations and  
the rest of the world as a group least squares regression estimates for two sets of  
parameters 1 the impact on imports of a change in exports and 2 the geographic  
distribution of the import change incorporating these results in a set of  
simultaneous equations one finds the impact of an exogenous change in the  
imports of a single country on the exports and trade balance of that country and  
all others the findings show that aside from the United States all major industrial  
countries adjust their imports to changes in export earnings US exports and  
balance of payments as a rule absorb a large portion of the worldwide trade  
disturbances generated by any country's import change author

the fundamentals of international trade and the balance of payments are well

known unfortunately they are often sadly neglected by policy makers and not well understood by journalists who opine on such matters as a result politicians advocate a variety of tax and trade measures that sound desirable but not only cannot be achieved but actually hurt the economy this book is designed to lay out the fundamentals that must be present for policy to work as intended the material in this book was tested over an 11 year period on more than 150 students most of whom entered the course with a minimum of training in economics their difficulties were noted and the material refined to overcome them this book is intended for those who have a serious interest in policy dealing with international trade and finance while the subject matter has not been made simple an impossibility it has been made clear
