many people consider martin heidegger the most important german philosopher of the twentieth century he is indisputably controversial and influential although much has been written about heidegger this may be the best single volume covering his life career and thought for all its breadth and complexity heidegger s perspective is quite simple he is concerned with the meaning of being as disclosure heidegger s life was almost as simple he was a german professor except for a brief but significant period in which he supported the nazi regime while that departure from philosophy continues to haunt his name and work one must question whether his thought from 1912 to 1976 should be measured by the yardstick of his politics from may 1933 through february 1934 th is anthology addresses his complex but simple thought and his simple but complex life in a real sense sheehan claims there is no content to heidegger s topic and legacy only a method but method must not be taken to mean a technique or procedure for philosophical thinking rather the topic of heidegger s thought and his pursuit of that topic the what and the how are one and the same thing heidegger writes alles ist weg everything is way and man s being is to be on the way in essential movement heidegger argues in our essence we humans are the topic and the point is not to be led there

so much as to come to know what we already know and to become what we already are this brilliant collection confirms this truism and is an excellent introduction to the work of this seminal thinker

since hegel philosophers have declared repeatedly that metaphysics is at an end a pronouncement that has sparked much contemporary philosophical debate what exactly does the end or closure of metaphysics mean and what are the implications of this view john sallis characterizes the end of metaphysics as a limit or horizon both enclosing metaphysical thought and opening the field of thinking beyond it he elaborates five areas in which the boundaries of thinking are extended imagination as an opening power the radicalizing of phenomenology s injunction to attend to the things themselves heidegger s shift of thinking toward an opening or clearing archaic closure through a return to plato and heraclitus and the nonidentity that takes place in the act of delimitation this last question is developed in relation to husserl s project of a pure phenomenology to the debate between hermeneutics and deconstruction and to the secluding of ground announced in schelling s thought
