the center for vocational and technical education is developing a system for acquiring and using occupational information effectively in revising and designing curricula the present manual provides methods procedures and forms to be used by a curriculum designer in acquiring useful information concerning occupational performance to facilitate acquisition of the skills needed to develop and use task inventories the procedures one should follow have been expressed in a series of explicit steps this format is an effective means by which to communicate to the reader the activities he must learn to perform as might be expected procedures to follow in performing some steps are described in more detail than in others this is due mainly to differences in the amount of guidance one finds in the literature the procedures and forms for constructing task inventories and analyzing occupational performance described in this manual have been used by the center for collecting information in three occupational areas the

three areas were 1 automotive mechanics 2 business data processing and 3 secretarial science the success of the center s efforts in these three occupational areas along with the kinds and quality of data collected has caused the project staff to judge the task inventory approach to be a more efficient and superior method for collecting occupational performance data than conventional task and job analysis techniques

this volume offers coverage of research in the field of survey nonresponse the primary threat to the statistical integrity of surveys this book was written in conjunction with the international conference on survey nonresponse october 1999
