this book opens a novel perspective on comics and literature interactions it claims that the two artistic media have always maintained a mutual emulation for as long as they have coexisted in media culture to demonstrate this the present research does not focus on literary adaptations in comics form but rather on a literary corpus that remains virtually unexplored comics related novels the purpose of this volume is to inventory french comics related novels and to study them within the limits of the french speaking world this book pieces together a literary history of bande dessinée through its novels from the nineteenth to twenty first centuries although the comic strip including the aptly named graphic novel has sometimes been regarded as the disciple of an unsurpassable literary model do these under studied adaptations in novel form not rather indicate a mutual relationship or even an emulation between the two media
