this book deals with complex fluid characterization of oil and gas reservoirs emphasizing the importance of pvt parameters for practical application in reservoir simulation and management it covers modeling of pvt parameters qa qc of pvt data from lab studies eos modeling pvt simulation and compositional grading and variation it describes generation of data for reservoir engineering calculations in view of limited and unreliable data and techniques like downhole fluid analysis and photophysics of reservoir fluids it discusses behavior of unconventional reservoirs particularly for difficult resources like shale gas shale oil coalbed methane reservoirs heavy and extra heavy oils

this title covers a wide range of topics related to the pressure volume temperature pvt behavior of complex hydrocarbon systems and documents the ability of equations of state eos in modeling their behavior the main objective of this book is to provide the practicing engineer and engineering student with tools needed to solve problems that require a description of the pvt of hydrocarbon systems from their compositions because of the dramatic

evolution in computational capabilities petroleum engineers can now study such phenomena as the development of miscibility during gas injection compositional gradient as a function of depth and the behavior near critical hydrocarbon systems with more sophisticated eos models

how to be a great online searcher demonstrated with step by step searches for answers to a series of intriguing questions for example is that plant poisonous we all know how to look up something online by typing words into a search engine we do this so often that we have made the most famous search engine a verb we google it japan population or nobel peace prize or poison ivy or whatever we want to know but knowing how to google something doesn t make us search experts there s much more we can do to access the massive collective knowledge available online in the joy of search daniel russell shows us how to be great online researchers we don t have to be computer geeks or a scholar searching out obscure facts we just need to know some basic methods russell demonstrates these methods with step by step searches for answers to a series of intriguing questions from what is the wrong side of a towel to what is the most likely way you will die along the way readers will discover essential tools for effective online searches and learn some fascinating facts and interesting stories russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as google earth google scholar wikipedia and wikimedia he shows when to put search terms in double quotes how to use the operator why metadata is important and how to triangulate information from multiple sources by the end of this engaging journey of discovering readers will have the definitive answer to why the best online searches involve more than typing a few words into google
