surveys with samples selected from an address frame derived from us postal service sources are often referred to as address based sampling abs surveys for an abs survey that is primarily conducted by mail web or face to face sometimes it is helpful to have a telephone number corresponding to the sample addresses for setting appointments or conducting nonresponse follow up prompts the usefulness of a telephone contact mode in a mixed mode abs design depends on both the percentage of addresses

for which telephone numbers can be appended append rate or match rate and the accuracy of the telephone numbers associated with addresses before planning a telephone contact as part of a mixed mode study the designer should know the likely effectiveness of the approach this paper focuses primarily on append rate information with a discussion of accuracy rates for a single abs frame telephone match rates vary by geography address type match vendor and by landline vs cell telephone number using very large samples of addresses from a total us abs frame we estimated state and national telephone append rates from marketing systems group s sources the append rates are summarized here and interactively at the website abs.rti.org/atlas
