the fourth edition of this textbook offers a structured introduction to global supply chain and operations management scom combining

value creation networks and operational processes it explains quantitative and organizational methods for planning and control of material information and financial flows in supply chains each chapter begins with an introductory case study while numerous examples from various industries and services help to illustrate the key concepts the book explains how to design operations and supply networks and collaborate with suppliers and customers it shows how to balance supply and demand a core aspect of tactical planning before turning to the allocation of resources to meet customer needs in addition the book covers some advanced topics in scm such as supply chain resilience sustainability industry 4.0 artificial intelligence and digital twins providing readers with a working knowledge of global supply chain and operations management with a focus on bridging the gap between theory and practice this textbook can be used in core specialized and advanced classes alike it is intended for a broad range of students and professionals in supply chain and operations management

the fashion retail environment is changing faster than ever this book shows the latest state of the art in both theory and practice in how to attract customers turn them into shoppers and to develop them into lovers of any fashion business the key focus lies on a deep understanding of the emotional part during the buying process it clearly shows the potential of new digital and social media and the integration of the on and offline world within the fashion retail world

jasmin michl conducts an in depth study on the use of human resource information systems hr is in personnel development and talent management with a particular focus on strategic areas of application and the role of stakeholders in her analysis the author integrates perspectives from various interest groups to identify the key challenges companies and their employees face during digital implementation projects in the hr domain using a mixed methods approach the study reveals that the successful implementation of technological projects in hr is not merely a technical issue but rather one deeply rooted in organizational conditions and social transformation the findings provide insights into transformational challenges and positioning issues within organizations offering a foundation for developing practical fields of action and strategic objectives

inhaltsangabe introduction problem definition in recent years many firms in the business to business b2b environment were trying to increase their market position by better product portfolios after these products became more and more complex product oriented firms started to offer services first as a reaction on customer requirements but soon also to create additional revenue on top of the core business this transformation included that service departments were not longer considered as a cost center but a business unit with increasing demand for higher customer satisfaction the recognition that customer requirements must be better understood but also

external drivers e.g. shareholders who pushed firms to focus on core competencies the term solution was defined as a combination of products and services that are required to gain competitive advantage after so called solutions are now known for many years still many companies did not succeed in transforming their businesses even worse besides failing in the transformation they sometimes even lost core markets scholars work has proven that although well defined in many framework constructs the practical implications for a successful solution transition especially in the sales domain are often not implemented or even unknown this becomes especially obvious in the metrics that are used by sales organizations today these do typically not indicate the necessary transformation that is expected due to the solution orientation objectives of this work the overall objective of this thesis is to provide a metric that helps to assess the solution readiness status of a firm's sales force sales is often considered to be a part of marketing it will be analyzed to what extent this perspective is justified and how this is influenced by the emergence of solutions as part of that an overview about the sales marketing interface will be given to create awareness for this topic this study will furthermore increase the understanding of the reader about applied metric concepts in marketing departments that can be found in existing firms today it will be demonstrated how shareholder value influenced their design and why these metrics are not aligned with latest research about firm value scope of work this work will outline metric elements that shall be applied for sales forces when moving towards solution orientation the structure of this thesis is split into 6 chapters and organized as

this textbook provides a comprehensive overview of macroeconomic relationships and explains the most important macroeconomic variables in an easy to understand manner the reader is introduced to important macroeconomic variables such as inflation and aggregate demand in chapters that build on one another they learn among other things how economic crises arise or the role and functioning of money capital and goods markets the aim is to provide the reader with economic knowledge that can be applied in business practice the economics material has been deliberately selected so that business studies content is usefully supplemented however detailed explanations and both application oriented and practice related examples and exercises make it easy for non economists to understand the complex economic topics well founded knowledge presented in an immediately comprehensible way

pre university paper from the year 2014 in the subject biology cytology grade 15 punkte 1.0 language english abstract all living things have to die this fundamental truth is held to apply even to the smallest unit of life cells however there is a phenomenon that is sometimes called biological immortality it refers to cells that live beyond their proclaimed life span which is roughly set by the hayflick limit all cancer cells have acquired this property they divide indefinitely which is the essential problem with cancer cells on the other hand researchers are very much interested in the molecular mechanism behind this property to may be able to use it to extend life and rejuvenate cells cells that are

not subject to the hayflick limit are generally seen as a threat to the human body however they are interesting subjects of experiments and scientists have already learned a great deal of knowledge by studying these mutants and continue to gain more important insights into the functioning of any kind of human body cell immortal cells can be boon and bane for humankind certain aspects of this issue will be discussed

european employment models are under pressure to meet new external challenges and changing internal needs nine country chapters covering the uk germany france sweden italy greece spain hungary and austria reveal that institutional change in production employment and welfare regimes is producing uneven outcomes these outcomes are found to depend not only upon the variety of capitalism or welfare regime but also on actors political will at national and european level and the model s specific architecture although examples of

revitalization affirm the potential for institutional renewal the prevalence of partial and incoherent reforms is eroding european employment standards what is at stake here is the future of the european social model the problem here is not so much the eu social and employment reform agenda but its influence on the organization of product markets and macro economic management where its policies are constraining options for social innovation

panoramic imaging is a progressive application and research area this technology has applications in digital photography robotics film productions for panoramic screens architecture environmental studies remote sensing and gis technology applications demand different levels of accuracy for 3d documentation or visualizations this book describes two modern technologies for capturing high accuracy panoramic images and range data namely the use of sensor line cameras and laser range finders it provides mathematically accurate descriptions of the geometry of these sensing technologies and the necessary information required to apply them to 3d scene visualization or 3d representation the book is divided into three parts Â part one contains a full introduction to panoramic cameras and laser range finders including a discussion of calibration to aid preparation of equipment ready for use part two explains the concept of stereo panoramic imaging looking at epipolar geometry spatial sampling image quality control and camera analysis and design part three looks at surface modelling and rendering based on panoramic input data starting with the basics and taking the reader through to more advanced techniques such as the optimization of surface meshes and data fusion there is also an accompanying website containing high resolution visual samples and animations which illustrate techniques discussed in the text panoramic imaging is primarily aimed at researchers and students in engineering or computer science involved in using imaging technologies for 3d visualization or 3d scene reconstruction it is also of significant use as an advanced manual to practising engineers in panoramic imaging in brief the book is of value to all those interested in current developments in multimedia imaging technology

proceedings from the tenth international conference on artificial life marking two decades of interdisciplinary research in this growing scientific community artificial life is an interdisciplinary effort to investigate the fundamental properties of living systems through the simulation and synthesis of life like processes in artificial media the field brings a powerful set of tools to the study of how high level behavior can arise in systems governed by simple rules of interaction this tenth volume marks two decades of research in this interdisciplinary scientific community a period marked by vast advances in the life sciences the field has contributed fundamentally to our understanding of life itself through computer models and has led to novel solutions to complex real world problems from disease prevention to stock market prediction across high technology and human society the proceedings of the biennial a life conference which has grown over the years from a small workshop in santa fe to a major international meeting reflect the increasing importance of the work

to all areas of contemporary science
