kathleen fitzsimmons a teacher for over twenty five years has written a book to make it easier for your child to learn to read the book explains what seems so difficult to see the process of reading it is a must have for parents with children with reading problems and parents who want to ensure their child s success in school children are expected to be reading in kindergarten and this book will help parents see what is important in learning to read and start down that road to success before their child is in school teaching your child how to read a guide for parents is the perfect book to use in a parent organization or parent training

a resource for designing and implementing intervention programs for at risk learners this authoritative resource provides step by step procedures for planning selecting and tailoring interventions for at risk learners with a unique focus on how to individualize interventions using actual case examples in addition this volume offers guidelines for gathering and interpreting data in a manner that assists in identifying targets for intervention and rich discussion and information relating to specific academic cognitive and behavioral manifestations of students with learning difficulties in reading math writing and oral language practitioners will also recognize and learn how to intervene with students from underserved and mis served populations who are at risk for learning failure including english language learners and students from impoverished environments each chapter describes how specific difficulties interfere with classroom tasks and explain how to select modify or otherwise tailor an intervention based on that information as with all volumes in the essentials of psychological assessment series this volume includes callout boxes highlighting key concepts extensive illustrative material and test questions the companion cd rom provides additional worksheets case studies and handouts

learning to read and to spell are two of the most important cultural skills that must be acquired by children and for that matter anyone learning a second language we are not born with an innate ability to read a reading system of mental representations that enables us to read must be formed in the brain learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols letters in print words with pre existing phonological sound and semantic comprehension cognitive systems for language although spelling draws on the same representational knowledge base and is usually correlated with reading the acquisition processes involved are not quite the same spelling requires the sequential production of letters in words and at beginning levels there may not be a full degree

of integration of phonology with its representation by the orthography reading on the other hand requires only the recognition of a word for pronunciation hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them the learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education the purpose of this research topic is to summarize and review what has been accomplished so far and to further explore these general issues contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research

campbell emphasizes how immersion in a highly literate classroom filled with print and language stimuli allows kids to intuitively build accurate letter sound relationships

the premiere guide for choosing homeschool curriculum for beginners or veterans cathy helps you wade through the curriculum jungle to choose what s right for each of your children reviews of hundreds of books games videos computer programs parent helps and much much more for all subjects learning styles cathy helps you determine each child s learning style then choose methods and resources that fit each child what your child needs to know what is typically taught at each grade level which resources allow your children to work independently which work best taught one on one identifying and dealing with learning disabilities plus a list of consultants for extra help testing the good and bad of testing different kinds of tests where to get them testing services addresses phone numbers faxes e mail and web sites for all publishers and distributors how to consolidate your shopping and save shipping costs
